senosan® – Always one step ahead

Wherever your journey takes you – the high quality plastic sheets of Senoplast will accompany you! With its innovative product range, the company covers a wide area of application possibilities in the motorhome and caravan industry. Senoplast is always steering towards the future and developing optimal solutions for each individual challenge. With its outstanding new product **senosan®** AM50 SOLAR PREMIUM-1, Senoplast has developed high impact multilayer sheets with a highly chemically resistant reverse side which facilitates further processing (bonding). The problem-free handling of **senosan®** products in the thermoforming process, the unique color range and various surface designs are only some reasons which argue for Senoplast as a partner in the caravan industry.

SENOPlast® – On tour with excellent quality

As one of the leading specialists in the development of plastic sheets and films, Senoplast is in possession of valuable properties: the company provides concentrated know-how in the field of co-extrusion technology, many years of experience in the caravan industry, high quality standards and distinctive customer orientation. Not least, Senoplast exactly knows the requirements of this industry in order to offer specific solutions with special products.

We would be pleased to advise you!

Senoplast is certified according to ISO 9001 and ISO 14001 which proves the company's quality, reliability and environmental orientation.

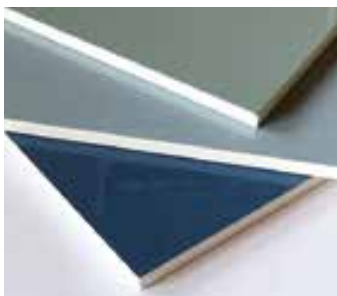

Top quality, customer specific product development, process specific application support and environment-friendly production – this is how we put our customers in the fast lane!

SENOSAN® for exterior applications

senosan® AM50 SOLAR PREMIUM-1

Multi-layer sheet with a base layer of high impact ABS and a co-extruded, high gloss and UV resistant top layer of high impact PMMA. The reverse side of the sheet is highly chemically resistant and therefore shows an excellent chemical resistance against a multitude of adhesives and sealing agents.

- » Excellent chemical resistance of the reverse side
- » Very good thermoforming properties
- » Excellent UV resistance
- » Solid and metallic effects
- » Great number of surface types:
high gloss, matt, satin, supermatt

ADVANTAGES

Various external parts for mobile homes and caravans, e.g.

- » Thermoformed roof-hoods
- » Front and rear panels
- » Side and decorative panels
- » Gas bottle housings and A-frame covers
- » Lights and indicator panels
- » Bumpers and front cladding parts

APPLICATION

senosan® for exterior applications

senosan® AM50 SOLAR EG products

With multi-layer sheets of high impact ABS and a co-extruded, UV resistant top layer of high impact PMMA, the **senosan®** AM50 SOLAR EG product range offers a huge variety of design possibilities.

- » Excellent thermoforming behaviour thanks to easyglide®
- » Excellent UV resistance
- » Solid and metallic effects
- » Great number of surface types: high gloss, matt, satin, supermatt

ADVANTAGES

- » Front and rear panels
- » Side and decorative panels
- » Gas bottle housings and A-frame covers
- » Lights and indicator panels
- » Bumpers and front cladding parts
- » External door panels

senosan® for exterior applications

senosan® AM50CI SOLAR EG black

Multi-layer sheet with a base layer of high impact ABS and a co-extruded, high gloss and UV resistant top layer of PMMA. In comparison with conventional plastic sheets available on the market, this innovative product offers increased color brilliance – even after thermoforming.

- » High gloss PMMA surface with increased color brilliance which still remains after thermoforming
- » Base layer of high impact ABS
- » Excellent UV resistance

ADVANTAGES

- » Glass replacement (e.g. blind windows)
- » High brilliant radiator grills, etc.
